7A - Rain water flows off of the roof into the 2 North side down spouts and is directed into the back yard earth about 30 foot out (north and 6 feet down.) If it rains constantly for more than 1 day, then the volume of water is too much for the natural soil drainage to cope with and a puddle forms. This dissipates into the earth over about the next 3 days if it does not rain. The puddle there currently is due to the inspector putting the water hose pipe into the down spouts to test for capacity. 241
